— WHY CHOOSE US —

Independent expertise focused on your outcomes. Giving you unbiased advice, better cost control and long-term asset performance.

Hands-on project leadership that takes accountability for delivering complex turbine projects on time and budget.

Proven delivery in high-pressure environments, with teams that mobilise quickly, integrate seamlessly, and keep critical operations running without disruption.

Flexible global network for parts, repairs, and engineering support, **reducing lead times**, lowering costs, and maintaining continuity across your operations.

CAPABILITIES

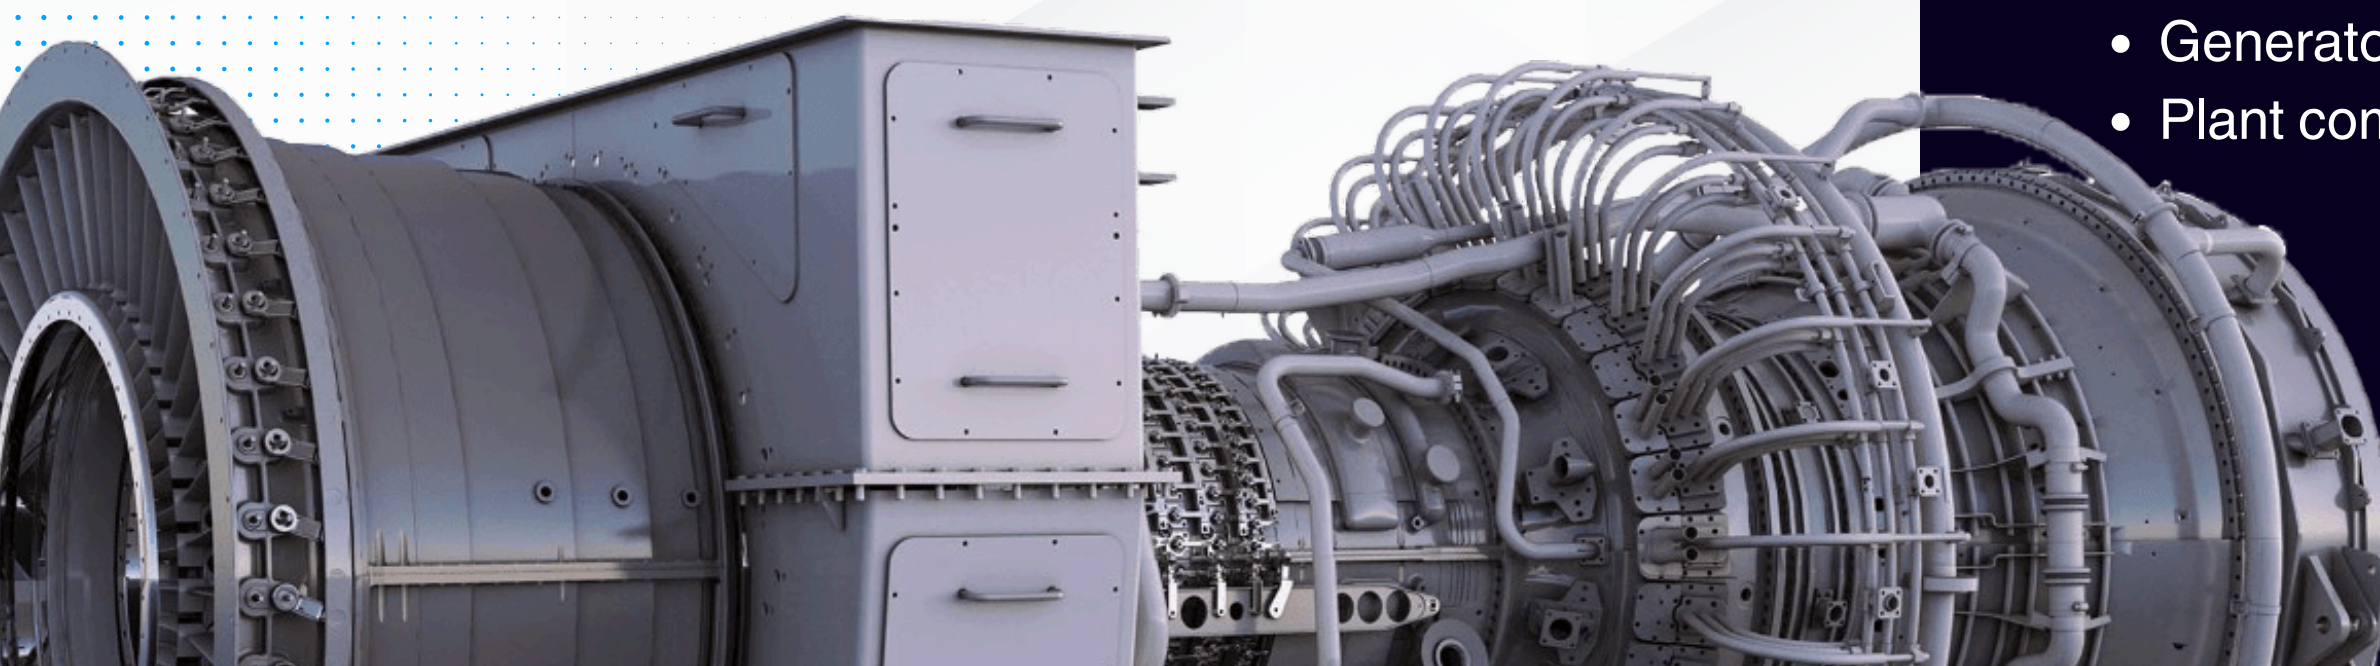

CAD Turbine Solutions is a provider of heavy-duty gas turbine services, including outages, inspections, repairs, overhauls. We specialize in;

- GE Frames (3, 5, 6B, 6FA, 7E/EA, 7FA, 9E, 9F, 9FA, 9FB, 9H),
- GE LM1600, LM2500, LM6000
- GE D11 Steam Turbine
- GE PGT10
- Siemens Energy SGT600 (GT10)
- Rolls Royce V2500, RB211, Tay Series, Avon, Adour, Pegasus, and Gnome
- Mitsubishi M701 Gas Turbine

CAD Turbine Solutions provides experienced gas turbine specialists across mechanical, instrumentation and controls, commissioning, technical advisory and project management disciplines. We deliver reliable on-site and remote engineering support for planned and unplanned maintenance, helping customers maintain safe, efficient and dependable plant operations.

Capabilities include:

- Scheduled outages (e.g. CI, HGPI & MI)
- Unscheduled outages
- Comprehensive QHSE programs
- Site management
- Control systems and retrofits
- Electrical engineering
- Technical support
- Generator overhauls
- Plant commissioning
- Plant upgrades
- Plant relocation
- Contractual maintenance agreements
- Auxiliary plant services
- Condition monitoring and diagnostics
- Quality assurance & advice
- Plant uprate & improvement
- Field refurbishment

SERVICES

EXCELLENCE IN EVERY ROTATION

Advisory Services

We deliver full-spectrum solutions for gas turbine operations, specialising in risk management, technical and commercial assessments, and cost-effective optimization strategies.

Outage & Field Support

Our skilled team, supported by OEM-trained engineers and advanced technology, provides solutions to keep your operations running smoothly.

Project Management

PMP®-certified professionals ensure projects are completed efficiently, on schedule, and within budget.

Engineering Solutions

We offer expert project oversight, quality assurance, and risk management, ensuring the highest standards are upheld.

Parts & Repair Network

From gas turbines to essential components and custom maintenance kits, we provide a broad range of solutions including asset liquidation.
